C++ / HTML5 / CSS3
ReactJs (Frontend Logic)
Vibe Coding (AI-Assisted Dev)
Material UI / Bootstrap
JavaScript (ES6+)

EDUCATION

B.Tech Computer Science
Oriental Institute (OIST)
2018 – 2022
CGPA: 8.47 / 10

ACHIEVEMENTS

Google Kickstart
Ranked 370th Global (2019)

Rapid Growth
2 Promotions in < 3 years

LANGUAGES

English (Advanced Proficiency)
Hindi (Native Proficiency)
Korean (Intermediate Comprehension)

Strategic Product Designer with 4+ years of experience and a deep focus on User-Centered Design. Rapidly promoted to Lead UX roles due to high empathy and the ability to solve complex, niche problems for global enterprises. Specialized in integrating Generative AI into workflows and architecting themeable design systems. Leveraging a strong technical foundation to bridge the gap between complex engineering and intuitive design.

PROFESSIONAL EXPERIENCE

Capgemini (AutoCloud Co-Innovation) *June 2022 – May 2026*

> Associate Consultant | UX Designer *(Promoted Apr 2025)*
> Senior Analyst | UX Designer *(Promoted Jan 2024)*
> Analyst | UX Designer *(June 2022 – Dec 2023)*

- **Gen AI Powered Order Simulation (SaaS):** Led end-to-end design for a predictive analytics tool forecasting millions of product configurations. Successfully scaled the solution for **two distinct industries (Automotive & IT Hardware)**, enabling diverse clients to simulate future sales scenarios for complex product variations.
- **Generative AI Supply Chain Assistant:** Designed the conversational UX for a multilingual AI assistant. Achieved a **20% decrease in support workload** and **80% enhanced operational efficiency** by automating responses for invoice and delivery tracking.
- **Automotive Supplier Gateway:** Redesigned the central entry point for global supplier ecosystems. Resulted in an **80% reduction in manual effort** and **50% faster supplier onboarding** via automated identity provisioning.
- **Sustainability Data Assistant:** Designed an end-to-end workflow for collecting, reviewing, approving, and publishing automotive ESG readings as the sole UX designer.
- **Enterprise Design System Lead:** Architected a themeable design system allowing the core application to be white-labeled for diverse clients with **100% component reusability**. Designed custom vector iconography, logos and visual assets to ensure product identity.
- **Stakeholder Management & Technical Leadership:** Led design walkthroughs, executive presentations, and product demos to secure concept validation. Conducted "UI Reviews" of frontend code to ensure pixel-perfect implementation during development handoff.

Capgemini (Internship) *Jan 2022 – May 2022*

:: Trainee (Software Engineer)

- Developed frontend components using ReactJs and Spring Framework, gaining deep insight into technical constraints.
- Facilitated a rapid transition into a full-time UX role by identifying and fixing internal UI usability gaps.

ACADEMIC PROJECTS

- **Real-Time Gesture Paint App:** Built a Python/OpenCV application for tracking hand gestures to draw digitally.
- **"Notify" Task App:** Developed a ReactJs & Material UI web application for task management.
